DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 91-102, 133, and 140, drawn to an electroconductor.

Group II, claim(s) 103-132 and 134, drawn to a coating method.

Group III, claim(s) 135-139, drawn to a coating device.¹

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The three Groups lack the same special technical feature. Claim 1 appears to lack novelty and/or an inventive step. See Speakman (US 2002/0105080), paras. 0073-0079. Speakman was cited as an "X" reference on the International Search Report filed December 12, 2005.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

¹ Claim 136 apparently should depend from claim 135.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
